Keterangan Program :

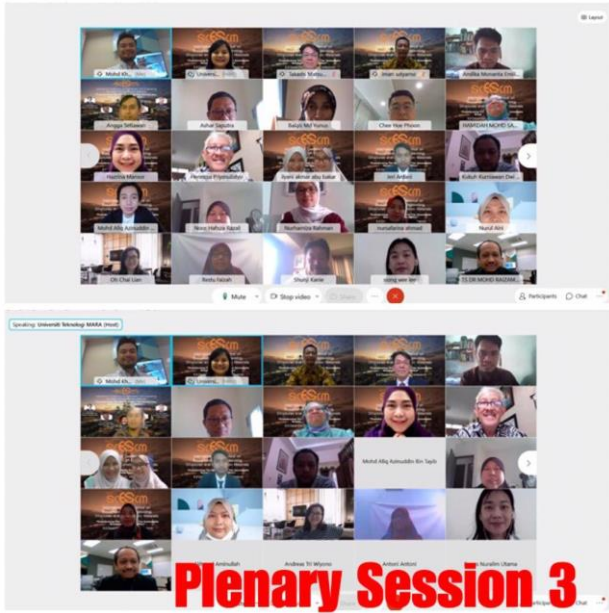

SCESCM is a biennial international conference focusing on sustainability concept implemented in design, construction and maintenance in any civil engineering structure. The conference is conducted on a rotational basis, every two years since 2012 and is increasingly enriched by outstanding keynotes, invited papers and selected participant's papers sharing the latest scientific findings and achievements among civil engineers across the globe.

The theme for the 5th SCESCM which will be held on 8 - 9 December 2020 "Transforming the World, Foster the Sustainable Development Goals (SDGs)" expresses the comprehensive range of issues and development in the area of civil and infrastructure. The conference is aimed at providing fresh perspectives on latest developments in design, construction and maintenance in any civil engineering structure and infrastructure facilities towards sustainability.
