Dear Dr Anisahyati Alsibramullid

RE: Confirmation of IStructE Student Liaison Officer Appointment

Thank you for your contribution to the Institution of Structural Engineers (IStructE) as a Student Liaison Officer (SLO) at the Universiti Teknologi MARA.

As an SLO, you provide vital support to developing engineers at the beginning of their lifelong quest to make the built environment better for all. We really value the work you do to engage students and introduce them to IStructE at this formative time. We hope that Student Membership will assist students during their studies and lead to a rewarding career in structural engineering.

As you know, IStructE's free Student Membership provides access to learning tools and benefits worth over £1,000, which can make a real difference to a student's education. Benefits include access to the unique Structural Behaviour Course, online access to our Essential Knowledge Series, a full library of Technical Guidance Notes and our world-renowned publication *The Structural Engineer*. Our Student Members also benefit from access to a global network of structural engineering professionals for more early career support.

To assist you in your role as an SLO we have produced a new SLO toolkit, which we have uploaded these resources to [istructe.org/my-account/slo/](http://istructe.org/my-account/slo/). You can download and edit posters and flyers whenever you need them.

We'll be adding more digital resources, eg email text you can use to communicate with your students, over the coming months.

In addition, we're always on hand to support you in your role and to answer any queries. If you have a request or want to know more, please email [education@istructe.org](mailto:education@istructe.org).

We will always be on hand to assist you throughout the year. If you require anything else, please get in touch.

Best wishes

Ian Stewart  
Membership Engagement Manager
